

CORPORATE ENVIRONMENTAL POLICY

Date: 27/08/2018

OVERVIEW

At R&S Services, we are committed to a long-term sustainable approach to caring for and safeguarding the environment. Specifically, "sustainability" means that we constantly endeavor to balance environmental considerations and social responsibility with our business goals. As a result, we strive to evolve and implement our Corporate Environmental Policy – in addition to complying with environmental laws and regulations. Over the long-run, only a sustainable approach will benefit the customers, shareholders, associates and communities we serve by both meeting our business goals and protecting and improving the quality of the environment in which we all live.

Our intent is to use the findings to inform and continue to evolve our corporate environmental strategy, as well as provide a benchmark for our future efforts.

POLICIES

Our environmental policy includes two major components to help minimize our impact on and achieve our objectives around the environment:

WASTE REDUCTION AND RECYCLING

Helping to preserve the environment by using the principles of reducing, reusing, and recycling.

WASTE REDUCTION AND RECYCLING

The Company's Environmental Policy pertaining to waste reduction, recycling, and resource conservation programs shall be reviewed annually.

Paper Recycling – The Company's locations shall recycle office paper.

The Company is committed to work towards reducing our overall consumption of paper through conservation and efficiencies – key elements of a sustainable approach.

Lamp Recycling – Lamps which contain hazardous metals such as mercury shall be recycled in accordance with EPA guidelines.

Computer Monitors – Monitors that are designated by the Company's Information

Rig & Ship Services LTDA
Guy Jozef Duriau
Gerente Geral - Diretor

Services (IS) Department as obsolete or are non-operational shall be picked up for recycling by a company specializing in computer equipment recycling.

Other Items - In addition to the above the company recycles several materials on an ongoing basis including bottles and cans, plastic bags, pallets, metal and hangers, among other substances.

RESOURCE CONSERVATION PROGRAMS

Energy Conservation – The Company has a centralized energy management system in place to encourage energy conservation. As needed, old lamps and light at our offices are being replaced with high efficiency lighting such as “green” lamps. As needed, light switches are being replaced with energy saving motion detector switches that will automatically turn off the lights with a timer after the last person leaves a room

Energy saving features built into computer hardware, programs and equipment to automatically shut down computer monitors and other peripherals when not in use shall be installed on computer equipment.

Water Conservation – Conservation of water shall be done in a variety of manners across the company including, but not limited to, by installing spring loaded faucet handles in bathrooms on the hot and cold water valves as needed. Whenever possible low flush toilets are installed.

This policy applies to all R&S Services Operations and shall be communicated all associates.

THIRD-PARTY VENDORS

Throughout the globe, R&S Services is committed to working with third-party vendors and service providers who, at a minimum, uphold the relevant environmental laws, regulations and policies of the countries in which they do business.
